

# CLINICAL LEADERSHIP

Our aim is to make healthcare better by delivering on a continuous improvement cycle across our range of services. We provide a test, scan, assessment or treatment for more than 2 million people per year. Our staff are supported in this work by a team of clinical directors, specialist experts and modality specific clinical

leads overseen by our clinical quality team. We improve access by delivering our services from over 300 locations, many of them accessible community sites. By providing safe, effective, responsive and compassionate care we aim to contribute to the healthcare economy of the UK and improve patient outcomes.
