

COMMUNITY HEALTHCARE INTEROPERABILITY ROADMAP

We understand that interoperability is one of the biggest challenges facing the healthcare economy today. Being able to seamlessly integrate our processes and systems with those of our customers enhances the patient pathway and clinical work-flow, delivering value and benefit for both patients and clinical professionals.

Our Interoperability journey has already begun. We have invested heavily in technology, building an integration hub that has helped us to use secure APIs and HL7 messaging to offer valuable digital solutions to referrers and patients. Our roadmap shows our commitment to continuing and accelerating this journey .
